

INVESTING IN OUR CAUSE.

YMCA CAPITAL PROJECTS

Each year, the Y provides New Yorkers with \$80 million in free or subsidized programs and services, delivered by over 30,000 dedicated employees and another 50,000 volunteers from across New York State. Investing in the YMCA is not just an investment in a charitable nonprofit, it is an economic driver that improves the communities and families we serve. Annually, New York State nonprofits generate \$179 billion in revenue and \$288 billion in assets.

As an established member of the nonprofit community in New York State, the Y partners with other community-based organizations to go beyond the four walls of the Y to meet the needs of their community in the greatest way possible. In order to effectively deliver impactful programs and services within our own four walls, YMCAs must be properly maintained, improved, and new facilities must be built. The Y's mission is to serve the needs of each unique community throughout New York and without an investment in infrastructure, we are hindered from making the greatest impact possible.

WHEN WE INVEST IN NONPROFIT INFRASTRUCTURE, WE ARE INVESTING IN THE COMMUNITY, THE LOCAL ECONOMY, AND OUR FUTURE.

DID YOU KNOW? ...

- The Y has over **\$30 million** in shovel-ready capital projects statewide.
- For every **\$1** invested in a nonprofit, **\$3** in services are returned to the local economy.
- Funding these YMCA capital projects would yield **\$120 million** in community benefits.
